Approved For Release 2001/03/07 : CIA-RDP96-00789R003700770005-3

Site involves object that is being evaluated for

dependable/applicable stable application of phenomena involved. Object is not yet "practicalized" - but is being evaluated for possible production & general use.

It is "hooked-up" to monitoring/evaluating equipment which controls conditions applied to object and ~~also~~ controls also what object does, but also keeps people involved in experiment continually aware - "feed-back" - of what is going on with object. Object is highly electronic, utilizes either a known phenomenon in a novel way or an unknown phenomenon (or even a ~~known~~ known phenomenon in a previous unthought of way).
